TITLE INDEX

Application of ultrasonic ranging and group technology concepts to robot material handling tasks, the, 291
Build-up of value in manufacturing and construction and in the economy, the, 49
Computer-aided single machine batch scheduling system, a, 221
Cost and price indices, 233
Depreciation and tax policies in certain East Asian countries, 125
Design of a continuous sampling plan under the conditioned inspection capacity, the, 269
Design of a production planning and control system for a toolroom: A case study, 81
Determination of overplanning margins for components in a consumer electronics factory, on the, 183
Determining safety stocks of large transfer lines for a preset efficiency, 137
Economic selection of a process level under acceptance sampling by variables, 69
Effect of discounting on inventory lot sizing models, the, 35
Enterprise analysis to conceptual database design in production systems, from, 171
Estimating the effect of conversion to a group technology layout on the cost of material handling, 103
Estimating the number of control points for production systems with variable speeds, 97
Feeding parts with random production speed to an assembly line, 91
Incorporating the effects of setups in lot-sizing procedures, 303
International manufacturing: An analysis on factory level of the centre–Periphery relations, 11
Joint ordering of two products with lost sales permitted, 209
Materials handling in the electronics industry: The same old problems, 111
Models of manufacturing systems in different operational contexts, 161
Multiple product inventory policies with unit load and storage space considerations, 245
Optimal and heuristic solutions for a simple common component inventory problem, 257
Optimal model and a heuristic technique for multi-stage lot-sizing problems: Algorithms and performance tests, an, 151
Present-worth moments of serially correlated cash flows, on the, 281
Scheduling for just-in-time manufacturing, 117
Selection of industry location alternatives, on the, 213
Service parts control problem, the, 195
Time-cost tradeoff in research and development: a review, the, 1
